(54) Title: WASHING DEVICE AND AQUA STOPPING DEVICE FOR THE SAME

(57) Abstract: An aqua stopping device (200) for washing
device (100) is provided. The aqua stopping device (200) in-
cludes a valve body (210), at least one valve (280), a signal
wire (271), a connecting wire (271), a connecting portion
(272), an inner case (260), an outer case (250). The valve
body (210) has a passage formed within. The at least one
valve (280) opens and closes the passage. The signal wire
(271) is connected to a terminal of the valve (280). The
connecting wire (271) is connected to the signal wire (271).
The connecting portion (272) is the portion where the signal
wire (271) and the connecting wire (271) connect. The in-
ner case (260) encloses at least the connecting portion. The
outer case (250) is provided at the exterior of the inner case
(260). The inventive aqua stopping device (200) reduces
manufacturing cost and time, and also the weight of the de-
vice to make handling thereof easier.
